About Me

I am a student pursuing a degree in Computer Engineering with a technical career in software development. My passion for technology has driven me to acquire skills in web and application development, along with experience in database management.

I have the ability to contribute solutions and effectively solve problems. My focus on finding creative and efficient solutions allows me to approach challenges with determination and perseverance.

I am always willing to stay updated with the latest trends and advancements in the technology field, as I believe in the importance of continuous evolution to provide innovative solutions.
